

IMMUNOSTEP SIZE EXCLUSION CHROMATOGRAPHY COLUMNS

- **Rapid & Reliable Exosome Purification**
 - 15 minutes to get a pure sample of intact vesicles, significantly more pure than with other methods.
 - ultracentrifugation takes from 2 to 96 hours to complete and shows variable recovery
 - Removes more than 99% of contaminating proteins and is reproducible from column-to-column.
 - qPCR downstream analysis possible.
- **Standardisable & Reproducible**
- **Pure & Clean Isolated EVs**
- **Reusable Columns.**
- **Box can be used as rack.**
- **High recovery (>50%)**
